

Premium Joint Supplement™

TECHNYFLEX®

EQUINE

Dosage Guide

Congratulations on purchasing Technyflex Premium Joint Supplement, we are positive you will be delighted with the results in your horse.

We recommend you follow these simple steps to get the most from Technyflex.

1. Dose as product is labelled i.e. one level scoop twice daily for 10 days, then one scoop once daily ongoing, remembering that this dosage guide is for an average sized horse. Correct dosing for the size of your horse is essential.

2. Watch for signs of improvement in your horse. If, after approximately 10 days you feel that there is more improvement to be gained, follow guidelines below:

Ponies and small horses less than 400kg Add ½ to 1 scoop extra

400kg - 550kg Add 1-2 scoops extra

550kg and over Add 1-3 scoops extra

3. Remember Technyflex has shown to be dose related/responsive. Generally the more given the stronger the effect.

NOTE: The following may require higher dosing -

- a. Heavier breeds
- b. Severe joint disease beyond general arthritis
- c. Strenuous exercise i.e. Thoroughbred training/racing, Competing horses
- d. Post surgical joint analgesia

4. Over time and once symptoms are under control the dosage may be reduced to the lowest effective daily dose.

5. Technyflex Equine is composed of all natural ingredients with no known negative side effects.

6. Technyflex is proven safe and natural. Remember not all GLM products are the same. They can vary in quality.

7. Technyflex is fully registered as a Veterinary Medicine and contains naturally occurring Glucosamine, Chondroitin with Co-factors Omega's, Trace Minerals and Vitamins.
